Just Touch Screen pages

Feel special with Just Touch. You can design your 'JUST TOUCH' specially thanks to the freely programmable interface. It can respond to all your requests with its multi-page usage advantage and innovative features.

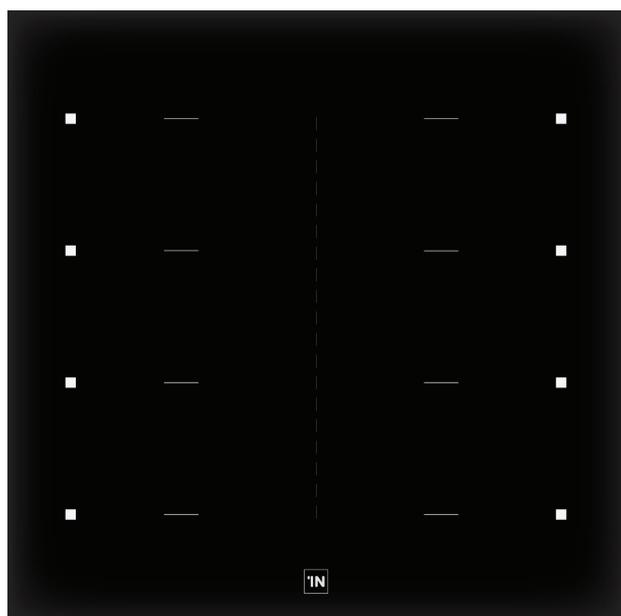

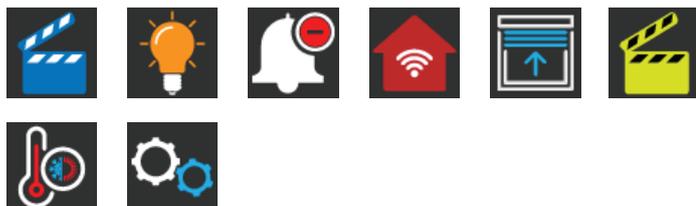

The best part is that it can be designed according to projects.

Just Touch offers you the opportunity to custom design the interface page and scenario pages as you wish, regardless of your residence, hotel or commercial project.

It offers you great ease of use and comfort thanks to its easy to use and legible interface design.

In addition, in the scenario pages you have edited, it offers the possibility to make the favourite page home page and to use it from both the screen and touch buttons.

In addition, by assigning frequently used scenarios such as lighting, air conditioning and curtain blinds to the touch buttons, it provides the opportunity to use without traveling on the screen.

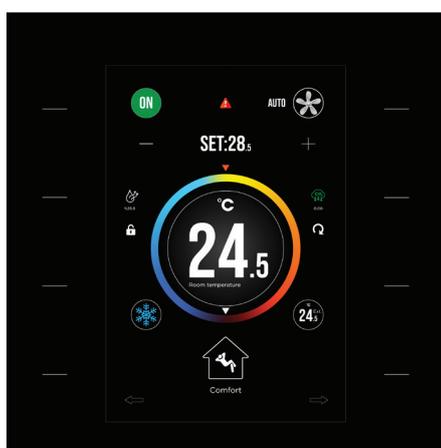

Just Touch Multiple Pages

Thanks to the INTERRA “JUST TOUCH” features, we can actually say that it is a mini touch panel.

We can call it a mini touch panel with features such as multi-page usage, customizable interface, thermostat, timer scenarios, carbon monoxide sensor, outdoor temperature sensor. In addition, it allows you to place pages and icons as you wish.
